

SALES CALL SIMULATION ACTIVITY

TRAINEE BRIEFING SHEET

SCENARIO: PASTOR DAVID MILLER

1. SCENARIO SETUP

BUYER PROFILE

Pastor David Miller, New Hope Community Church
(350 active members)

BUYER STYLE & DIALOGUE GUIDE

Talker-Supporter Hybrid. Warm, relational, mission-focused, community-oriented. Dialogue Pace: maintain 50/50 balance. Focus on trust, stories, and community impact.

TIME CONSTRAINT

10 minutes (relaxed but respectful of church programs)

DESIGNATED PRODUCT

Roc Giving (Donor Management and Mobile Campaigns)

OPENING STATEMENT

"Hi Pastor David, thanks for chatting today. I've been following your basketball court project and would love to hear how it's coming along. I'll keep this brief, but when we spoke last week, you mentioned that giving is inconsistent when members miss a service, your volunteers are burning out tracking checks manually, and it's hard to get younger givers excited about the court project. Is that still what you're seeing?"

2. DISCOVERY & VALUE ALIGNMENT

CUSTOMER NEED (When they say...)	PRODUCT FEATURE (We explain...)	VALUE & BUSINESS IMPACT (Which means...)
Inconsistent Weekly Giving Weekly giving drops off whenever members are traveling or cannot make Sunday service.	Recurring Online Donations Set-and-forget digital giving options that members can configure on your website or mobile portal.	Consistent Church Funding Provides the church with steady, predictable monthly support to run community outreach programs.
Court Campaign Momentum Traditional envelopes and paper checks make it hard to track fundraising progress dynamically.	Text-to-Give & Mobile Campaigns Simple Text-to-Give keywords and mobile campaign pages built specifically for community projects.	Accelerated Project Completion Keeps donors engaged and excited on the spot, with visible real-time campaign tracking.
Volunteer Administrative Burnout Volunteers spend hours counting cash, sorting checks, and manually writing out tax receipts.	Automated Contribution Tracking Secure donor management software that logs donations and generates tax statements with one click.	Ministry-First Operations Frees up volunteer hours from administrative paperwork, letting them focus on community service.

3. OBJECTION RESPONSE & NEXT STEPS

OBJECTION RESPONSE

EXPECTED OBJECTION

"We really care about keeping our church community personal. I don't want giving to feel commercial or like a cold business transaction."

RECOMMENDED DIALOGUE PATH

- **Step 1 (Cushion):** "I completely agree. Giving is a spiritual act, not a business transaction."
- **Step 2 (Explore):** "What's the main concern there, are you worried the digital giving page will look too commercial, or is it more about making sure older members don't feel excluded?"
- **Step 3 (Solve):** Show how the giving page is customized with church imagery and photos of the court, keeping it relational, while traditional check-giving remains fully supported.
- **Step 4 (Commit):** Pivot back to showing them a mockup of their custom page.

NEXT STEPS

TARGET COMMITMENT

Secure a scheduled 15-minute demo.

CLOSING STATEMENT

"Let's take 15 minutes next week to look at a simple mockup of what your custom basketball court giving page could look like. Would Tuesday morning or Thursday afternoon work better?"

4. CRITICAL GUIDELINES

Product Focus: Pitch the software solution Roc Giving. Pitching standard retail terminals instead of Roc Giving is a failure.

Reference Prior Connection: Establish continuity by referencing the previous scheduled appointment. Do not open the call as a cold call.

Avoid Technical Jargon: Use simple, direct language. Do not reference internal sales framework terminology.

Objection Validation: Validate customer objections before responding. Do not argue or become defensive.

DO THIS	AVOID THIS
Pitch Roc Giving	Pitching the wrong product (standard credit card terminals)
Discuss donor engagement, volunteer relief, and campaign metrics	Using overly technical financial transaction or complex merchant account jargon
Validate and address objections with warm empathy	Arguing, getting defensive, or ignoring customer concerns
Engage in two-way conversation and checkpoints	Monologuing or speaking without checking for agreement from the buyer

5. TRAINEE SELF-CHECK CHECKLIST

Reference while completing the simulation activity. Use this checklist as a self-assessment to ensure you have met all L&D guidelines and avoided critical pitfalls.

- ☐ **Did you confirm their challenges early?** Verified the three setup issues during your opening rather than jumping straight into a product pitch.
- ☐ **Did you explain the concrete business benefits?** Connected product features back to customer value (such as the specific labor or financial math).
- ☐ **Did you keep the conversation balanced?** Avoided long monologues by checking in after every 1-2 sentences to get confirmation from the buyer.
- ☐ **Did you focus only on relevant features?** Sticking strictly to the tools that solve their specific problems without dumping unrelated facts.
- ☐ **Did you use the 4-step objection path?** Validated their concern (Cushion) and asked a question to explore it before presenting a solution.
- ☐ **Did you close with a scheduled next step?** Secured a specific commitment for a 15-minute demo instead of leaving the follow-up vague.

SIMULATION PERFORMANCE SUMMARY

To be completed by the trainee or evaluator after the session.
