

SALES CALL SIMULATION ACTIVITY

TRAINEE BRIEFING SHEET

SCENARIO: MIKE TURNER

1. SCENARIO SETUP

BUYER PROFILE

Mike Turner, Owner, Precision Plumbing & Drain (4 field technicians, 4 trucks)

BUYER STYLE & DIALOGUE GUIDE

Doer. Highly practical, results-oriented, impatient, direct. Dialogue Pace: maintain 50/50 balance, conciseness is key. Focus immediately on cash flow and time savings.

TIME CONSTRAINT

10 minutes (between calls on a job site)

DESIGNATED PRODUCT

Roc Services (Mobile Invoicing and Dispatch Software)

OPENING STATEMENT

"Hey Mike, thanks for grabbing the phone. I know you're busy on a job site today, so I'll get right to the point. When we spoke last week, you mentioned that technicians are collecting payments inconsistently in the field, paper invoices are dragging out your collection times, and you've got a backlog of manual invoicing in the office. Is that still what's going on?"

2. DISCOVERY & VALUE ALIGNMENT

CUSTOMER NEED (When they say...)	PRODUCT FEATURE (We explain...)	VALUE & BUSINESS IMPACT (Which means...)
Inconsistent Field Payments Technicians walk away from jobs without collecting payment, or paper checks sit in trucks.	Mobile In-Field Processing Allows field technicians to invoice and process card/ACH payments on-site via mobile app.	Zero Billing Lag You collect payments immediately on job completion, preventing revenue leakage.
Paper Invoice Delay Writing and mailing paper invoices takes days, delaying payment clearances by weeks.	Mobile Invoice Generator Generates and sends digital estimates and invoices to customers instantly on-site.	Accelerated Cash Flow Gets funds cleared in minutes rather than weeks, supporting business during slow seasons.
Office Bookkeeping Backlog Office staff spends hours typing paper invoices and manually reconciling billing details.	QuickBooks Sync Automatically syncs all generated field invoices and payments into accounting.	Admin Time Recovery Eliminates double-entry and saves manual reconciliation and billing follow-up hours.

3. OBJECTION RESPONSE & NEXT STEPS

OBJECTION RESPONSE

EXPECTED OBJECTION

"Look, my guys are plumbers, not tech guys. They're going to complain and refuse to use some complicated app."

RECOMMENDED DIALOGUE PATH

- **Step 1 (Cushion):** "I hear you. If the field techs find it complicated, it's just going to sit there unused."
- **Step 2 (Explore):** "What's the biggest concern there, is it that the app itself has too many steps, or is it the time it takes to get them set up on their phones?"
- **Step 3 (Solve):** Explain that the field tech interface is designed for 1-click invoicing and takes less than 5 minutes to learn.
- **Step 4 (Commit):** Pivot back to the demo so they can see how simple the app looks on a mobile screen.

NEXT STEPS

TARGET COMMITMENT

Secure a scheduled 15-minute demo.

CLOSING STATEMENT

"Let's set up a quick 15-minute online walkthrough so you can see how simple the mobile screen is for your techs. Do you have some time Tuesday morning, or would Thursday afternoon work better?"

4. CRITICAL GUIDELINES

Product Focus: Pitch the software solution Roc Services. Pitching standalone credit card terminals instead of Roc Services is a failure.

Reference Prior Connection: Establish continuity by referencing the previous scheduled appointment. Do not open the call as a cold call.

Avoid Technical Jargon: Use simple, direct language. Do not reference internal sales framework terminology.

Objection Validation: Validate customer objections before responding. Do not argue or become defensive.

DO THIS	AVOID THIS
Pitch Roc Services	Pitching the wrong product (standalone retail terminals)
Discuss mobile invoicing speed and QuickBooks integrations	Using overly technical software architecture or complex payment routing jargon
Validate and address objections directly and concisely	Arguing, getting defensive, or ignoring customer concerns
Engage in two-way conversation and checkpoints	Monologuing or speaking without checking for agreement from the buyer

5. TRAINEE SELF-CHECK CHECKLIST

Reference while completing the simulation activity. Use this checklist as a self-assessment to ensure you have met all L&D guidelines and avoided critical pitfalls.

- ☐ **Did you confirm their challenges early?** Verified the three setup issues during your opening rather than jumping straight into a product pitch.
- ☐ **Did you explain the concrete business benefits?** Connected product features back to customer value (such as the specific labor or financial math).
- ☐ **Did you keep the conversation balanced?** Avoided long monologues by checking in after every 1-2 sentences to get confirmation from the buyer.
- ☐ **Did you focus only on relevant features?** Sticking strictly to the tools that solve their specific problems without dumping unrelated facts.
- ☐ **Did you use the 4-step objection path?** Validated their concern (Cushion) and asked a question to explore it before presenting a solution.
- ☐ **Did you close with a scheduled next step?** Secured a specific commitment for a 15-minute demo instead of leaving the follow-up vague.

SIMULATION PERFORMANCE SUMMARY

To be completed by the trainee or evaluator after the session.

TOTAL SCORE
